

Family Protection and Preservation Bureau

### **BUREAU OF FAMILY PROTECTION AND PRESERVATION**

FSSA's Bureau of Family Protection and Preservation (BFPP) and The Division of Family and Children local offices serve all children in the state who are at risk of abuse or neglect. The BFPP administers programs that provide child welfare and family services, child abuse prevention services, foster care, adoption, independent living, residential licensing and youth services.

To promote best-standards and provide quality services for children, BFPP initiated efforts in CY 2001 to begin the accreditation process with the Council on Accreditation (COA) of Services for Families and Children, Inc.

The Family Preservation Program carries out the Division's goals to prevent unnecessary separation of children from their families by identifying family problems and assisting families in resolving them.

The program also seeks to return children who have been removed from their own homes to their families through the provision of services to the child and family when a court finds that reunification is in a child's best interest.

The Family Preservation Program provides services to prevent out-of-home placement or to reunify children and their families in cases of substantiated reports of child abuse or neglect. Program services offered to families include education, counseling, visitation, sexual abuse treatment, parent aides, homemaker services, and home-based family services.

The program carries out these goals by providing four (4) basic services: Service Referral Agreements, Informal Adjustments, Services to a Child in Need of Services (CHINS) and Reunification Services.

- Service Referral Agreements voluntary agreements made by the family case manager, parent(s) and other involved parties when a family admits to a problem, the child is not at serious risk in the home, and no court involvement is sought.
- Informal Adjustments agreements made by the family case manager, the child's parent(s) guardian, custodian, attorney and other involved parties when a family admits to a problem and the child is at minimal risk in the home. The agreement is filed with the juvenile court, must be approved by the court, and may include many of the above-noted services.
- Services to a Child in Need of Services (CHINS) services to children made wards of the court include case planning, periodic case review and many of the services mentioned above. The objective is to return children to their families through the provision of services to the child and family.
- Reunification Services services provided to families when a child who has been removed from the
  family has a goal to return to the family. Any or all of the above-noted services may be offered. The
  objective is to reunify children and their families in cases of substantiated reports of child abuse or
  neglect.

Approximately 12,500 children and their families are being actively served at any given time. The state of Indiana has developed a five- (5) year plan for family preservation and support services with the help of local Step Ahead councils and local service needs assessments. The five- (5) year plan is funded by federal Title IVB Part II monies.

The BFPP provides child protection services to protect Indiana's children from further abuse or neglect and prevents, remedies, or assists in solving problems that may result in neglect, abuse, exploitation, or delinquency of children.

CPS operates a toll-free hotline (1-800-800-5556) for people to call and report suspected cases of child abuse or neglect on a statewide basis. Although reports can be made in person or by correspondence, the vast majority of child abuse and neglect reports are made by telephone. CPS receives and initiates investigations of abuse reports on a 24-hour basis.

Investigations of abuse or neglect may be substantiated or unsubstantiated. The child's safety is the primary factor in all CPS investigations. Families receive services based on the severity of the abuse or neglect, an assessment of the child's and the family's needs, and an assessment of the relative safety and risk to the child in the home.

In 1995, there were 69,458 reports of neglect and abuse; that has decreased to 43,009 in 2000. This is a decrease of 38%.

The Institutional Child Protection Services Program serves children who allegedly have been abused or neglected in any institutional or out-of-home care. Reports are received via a statewide hotline, and investigations of abuse are initiated within 24 hours. This program determines whether the child should remain at the facility or home, whether adequate protection can be provided, whether referrals are needed for follow-up monitoring, and whether referral for prosecution of perpetrators is warranted (substantiated cases).

Facilities could include Child Care Center (licensed and unlicensed/exempt), Child Care Home, Foster Family Home, Registered Child Care Ministry, Residential Facility, School, State Institution, Hospital, Other.

Perpetrators could include facility staff and other residents.

A child fatality review process has been in place since SFY 1999 to improve information gathering and prevention strategies in the area of child fatalities due to abuse and neglect. A state team reviews detailed information regarding each death involving substantiated abuse and neglect and shares aggregated information with partners, including Prevent Child Abuse (PCA) Indiana, to develop prevention strategies. The Division also contracted with PCA Indiana to coordinate a Child Fatality Review Task Force involving a wide variety of concerned professionals, from coroners to law enforcement, to make recommendations to the Division regarding local fatality review processes.

#### Children's Trust Fund

The Children's Trust Fund collects revenues from the "Kids First" license plate and distributes the funds through grants to agencies dedicated to preventing child abuse and neglect.

The goal of the Children's Trust Fund is to provide primary and secondary prevention services to Indiana's children to help ensure that they are not abused or neglected. Children's Trust Fund grant recipients work to provide practical solutions that teach good parenting skills, including the importance of nutrition, how to be an active parent and how to discipline without spanking the child. Other programs provide children with encouragement that helps them grow up healthy and break the intergenerational chain of abuse and neglect.

From big cities to small towns, the Children's Trust Fund puts Indiana children first by funding programs that prevent child abuse and neglect. One such program Mentor Mothers pairs a teenage mother with a volunteer Mentor Mother who teaches parenting and independent living skills. Another unique program giving parents and kids an Even Start allows mothers to earn their General Equivalency Diploma (GED) or learn other skills while their children attend on-site daycare. Without encouragement and structure, many children fall behind in school and life.

The CTF sends contributions from Kids First license plate sales directly to local community programs that prevent the tragedy of child abuse and neglect.

More than 100,000 Hoosiers have purchased the "Kids First" plates since the Bureau of Motor Vehicles began offering them in 1995.

Since Indiana began offering the "Kids First" license plate in 1995, about \$10 million in grants have been allocated to agencies dedicated to preventing child abuse and neglect.

Income for the Children's Trust comes from "Kids First" plate sales, fee collections (marriage & divorce filing fees), heirloom birth certificate sales, cash donations and interest.

Total grants and dollars awarded by year:

Year	# Programs	\$ Award
1997	54	\$1,968,000
1998	67	\$2,432,857
1999	74	\$2,938,895
2000	66	\$2,616,895
2001	67	\$2,278,072

<u>Indiana's Foster Care Program</u> provides 24-hour care to children who can no longer safely remain in their homes due to the occurrence or risk of abuse or neglect, or due to their own need for care and treatment for behaviors which constitute a danger to themselves or others.

Children may be placed in an approved relative home, a licensed foster family home, a group home or child-caring institution, or other court-approved facility.

State policy is to place children in the least restrictive, most family-like setting which meets the child's needs. When possible, a child is placed in close proximity to the child's family, particularly when reunification with the family is the case plan goal.

Foster parents and other care providers work to help reunite a child with a biological parent, or care for a child until that child is adopted. Foster parents and child care professionals are involved in case planning and provision of services to the child and the child's family utilizing a team approach with the child's caseworker. Local DFC staff ensure that foster parents receive proper notification concerning case activities of children in their care.

In 2000, 57% of children in foster care had been in foster care for less than one year. This represents an increase of almost 10% compared with 1999 when 52% of children in foster care had been in foster care for less than one year. In 2000, 22% of children in foster care had been in foster care for more than two years. This represents a decrease of approximately 15% compared with 1999 when 26% of children in foster care had been in foster care for more than two years.

In 2000, 61% of children in out-of-home care had been in out-of-home care for less than one year. This represents an increase of 22% compared with 1999 when 50% of children in out-of-home care had been in out-of-home care for less than one year. In 2000, 24% of children in out-of-home care had been in out-of-home care for more than two years. In 1999, 23% of children in out-of-home care had been in out-of-home care for more than two years.

The number of homes, agencies and facilities is at an all time high! The number of foster homes licensed by the Division of Family & Children or by child placing agencies is an all time high. The decrease in homes in 1998 was caused by the great increase in the number of adoptions in 1998 brought about by the Adoption and Safe Families Act (ASFA). A great number of children were adopted by foster parents who, in some cases, stopped being foster parents and focused solely on being adoptive parents.

The Title IV-E Foster Care Program provides federal funds for foster care or residential care per diem payments and for medical services for children whose families were receiving Temporary Assistance for Needy Families (TANF) on their behalf, or would have been eligible had they applied at the time the court ordered them removed from their homes.

By claiming federal IV-E reimbursement local DFC offices can maximize the financial resources available to serve children and families in their communities. Eligible services include maintenance payments such as food, clothing, shelter, daily supervision, school supplies and liability insurance. Also included are Medicaid services and Title XX services.

### **IV-E** Waiver Program

In July 1997, the federal Department of Health and Human Services approved Indiana's application for a Child Welfare Demonstration Project, also known as the IV-E Waiver Project. The waiver redesigns the current federal reimbursement system for funding children's services. It emphasizes a more aggressive development of a family focused, community based service delivery system for children in care. The goal of the waiver is to stimulate the growth of community based children's services, thereby shifting significant costs from out-of- state and out-of-county placement options to more locally based and in-home programs. Each child in the project must have a plan for services approved by the local judge with juvenile jurisdiction.

The project was implemented in a phased approach covering all 92 counties over the course of calendar year 1998. The demonstration project ends in December 2002 and will be the subject of a third party evaluation as to its effectiveness in improving family functioning, reducing child abuse and neglect, and expediting more permanent placements for children in a family setting through family reunification, adoption, guardianship, or independent living.

Indiana was the seventh state to have been approved for the IV-E Waiver Project and the only one whose waiver program is statewide. Indiana's project was the largest in scope and involved the use of foster care funds in a more flexible approach to meet the needs of children and their families. Interagency agreements for the waiver are in place in each of the 92 counties between the local judge, probation officers and the local Director of the Office of Family and Children. The waiver applies to 4000 children at any given time and does not require that the children be removed from the homes in order to access federal funds.

#### IV-E Reimbursement

The claiming of federal IV-E reimbursement is a high priority for the Division. By doing so effectively, local offices can maximize the financial resources available to serve children and families in their local communities. Reimbursement claims are possible in a case when there is a combination of an eligible child, an eligible facility and eligible services.

For a child to be eligible, he or she must be under age 18 and must meet 1996 AFDC eligibility requirements at the time of removal. In addition, there must be a judicial finding in the child's case that it was contrary to the child's welfare to remain at home and that the state provided services to prevent the child's removal from home, or that reasonable efforts to return the child home were not required. Reimbursement claims are possible in a case when there is a combination of an eligible child, an eligible facility and eligible services.

A facility is eligible if it houses no more than twenty-five children. In addition, the facility must be licensed by the state, and must not be primarily for detention purposes.

Eligible services include maintenance payments such as food, clothing, shelter, daily supervision, school supplies and liability insurance. Also included are Medicaid services and Title XX services.

### **Adoption Program**

Indiana's Adoption Program serves children who are legally available for adoptive placement and who are in need of placement with a permanent family.

The State Adoption Program includes recruitment activities and services to the prospective adoptive family, as well as financial support and services to the family receiving the child.

The objective of Indiana's Adoption Program is to find permanence with a family for all Indiana children who are legally available for adoption.

Indiana received a \$1.8 million performance bonus from the U.S. Department of Health and Human Services for DFC's increase in adoptive placement, the sixth highest award in the nation.

Children who are legally available for adoptive placement and who are in need of placement with permanent families must meet qualifications as established by the Division of Family and Children. Finalized adoptions have steadily increased from 296 in 1994 to 1118 in 2000, representing a 278% increase.

The Indiana Adoption History Program was established as a result of enabling legislation passed in 1993. The purpose of this program is to assist persons seeking information regarding adoptive situations to which they were a party. The Indiana State Department of Health (ISDH) is responsible for administering the program, but the county DFC offices play a major role in assisting persons to obtain information not available through ISDH. Parties to an adoption may obtain non-identifying information from the county offices without a court order if it is available. However, no identifying information may be released by a county office without obtaining permission from ISDH to do so, since certain signatures must be on file before identifying information can be released.

### **Special Needs Adoption Program**

The Special Needs Adoption Program (SNAP) was implemented in 1990 to recruit adoptive families and facilitate the adoptive placement of children with special needs.

The adoption program works in partnership to recruit minority adoptive families, facilitate the adoptive placement of children with special needs and provide the community at large an educational service regarding the needs of adoptive children. Special needs children are usually school age. Many are of minority background, members of a sibling group or have mental, physical and/or emotional challenges.

The Special Needs Adoption Program employs ten regional adoption casework specialists to recruit adoptive families as well as work with children and families in order to facilitate the adoptive placement of children who have special needs.

The adoption program also works in partnership with the Indiana One Church, One Child Program, Inc; the Children's Bureau of Indianapolis, Inc; the Villages of Indiana, Inc; Children are the Future, and Indiana Youth Advocate Program to recruit adoptive families for children featured in the "My Forever Family" picture book (Indiana's monthly listing of waiting children) and provide adoption services to these families.

Also, the Children's Bureau of Indianapolis coordinates the publication of the "My Forever Family" picture book, Internet site, adoption hotline, and media contacts to promote the adoption program. "My Forever Family" picture book is part of Indiana's adoption initiative which is a statewide effort to find permanence for all children in Indiana with special needs. The children in this registry are all waiting to be adopted and are considered special needs children. Some need to be adopted with brothers or sisters. Some have physical, mental or emotional impairments.

The "My Forever Family" recruitment campaign reported 4,076 inquiries about adoption and the children featured in the "My Forever Family" picture book. As a result of the work done by the SNAP and its partners, a record 1258 children were placed in permanent families last year – an 11% increase over the number of waiting, adoptable special needs children placed in 1999.

In addition, Indiana's Adoption Initiative, a statewide community outreach program administered by the Children's Bureau of Indianapolis, reports an increase in inquiries from prospective adoptive parents from 10,365 in 1999 to 16,831 in 2000. Total inquiries recorded at the Children's Bureau for 1996 (prior to state funding added to launch the initiative) were just 220.

In 1993, 326 SNAP children were placed in adoptive homes. In 2000, 1,258 SNAP children were placed in adoptive homes, for an increase of 285% over 1993.

Financial assistance programs available for families who adopt eligible special needs children include:

- Non-Recurring Adoption Expenses Program provides funds to reimburse the adoptive parent for one-time expenses incurred in legally adopting a special needs child.
- Federal Adoption Assistance Program provides financial assistance to families who adopt IV-E eligible children via per diem payments and medical assistance.
- State Adoption Subsidy Program provides financial assistance to families who adopt children with special needs and demonstrate to the court that per diem and/or medical assistance is needed in order to meet the adopted child's needs.

The Interstate Compact on the Placement of Children is designed to protect the interests and safety of all children who are being placed in out-of-home care or for adoption across state lines and national boundaries. This compact provides a mechanism for the approval of the placement of children into relative, foster, or adoptive homes or into residential facilities and for on-going monitoring of the child's progress in these out-of-state placements.

The Residential Licensing Sections of the Bureau have licensing authority for a number of facilities and homes. The primary purpose of licensing of foster family homes is to minimize the risk to children in out-of-home care by monitoring and enforcing compliance to minimum health, safety, and program standards as established in 470 IAC 3-1. Local Offices of Family and Children and licensed child-placing agencies have the responsibility and the authority to assess compliance with these standards and to submit licensing recommendations to the Bureau of Family Protection and Preservation.

Also, the section collaborates with the State Fire Marshal's Office, the State Department of Health, and the office of the State Building Commissioner. These cooperative efforts ensure that minimal standards of fire and building safety and public health protection are maintained for children in child (day) care centers and homes.

The Section also issues licenses to residential child care institutions and group homes. Child caring institutions are agencies which provide 24-hour residential care for dependent, neglected, abused, delinquent, or troubled children who are unattended by a parent, guardian, or custodian. The minimum standards for child institutions servicing 11 or more children are found in 470 IAC 3-11 and 470 IAC 3-12. The minimum standards for group homes (agencies serving ten or fewer children) are found in 470 IAC 3-14 and 470 IAC 3-15. The Bureau also has authority to license private secure facilities. The minimum standards for private secure facilities are found in IAC 470 3-13.

The Division of Family & Children (DFC) in conjunction with state fire inspectors monitors and reviews compliance to these standards at least annually in an effort to maximize the health, safety, and well-being of children placed in these residential treatment programs.

Division staff additionally issues licenses to child-placing agencies. Child-placing agencies are authorized to recruit foster parents and to make foster family home licensing recommendation to the DFC, to complete adoptive home studies, and to place children in either foster homes or adoptive homes. Some child-placing agencies provide only foster care services while others provide both foster care and adoptive services including therapeutic foster care and international adoptions.

The number of residential child caring facilities with the exception of SFY 1998 has continually increased, going from 440 facilities in 1991 to 1878 facilities in 2000.

### Assisted Guardianships

Assisted Guardianship is a possible permanency option for children under the supervision of the Division of Family and Children, and is considered when a child is placed with relatives who promote a permanent, long-term living arrangement that is in the best interest of the child.

This option is available after a court has determined that reunification with the child's parents is no longer feasible, and that adoption is not in the best interest of the child. Both the child and the relatives must meet specific eligibility requirements, and the program calls for a monthly subsidy to be provided based on the need of the child as defined by Temporary Assistance for Needy Families (TANF) guidelines.

### Title IV-E Independent Living Program

The Title IV-E Independent Living Program provides the state with funding to purchase direct services for all youth (ages 14-21) living in foster or residential care who are in need of independent living skills. Services that are purchased through this program include counseling and support groups, vocational training, daily living skills and job search skills. The goal of the Title IV-E Independent Living Program is to obtain services for youths living in substitute care who are in need of independent living skills. Services are planned and purchased by the Child Welfare Executive Committee in each region and through a competitive negotiation process with licensed child-caring institutions for this program.

#### Accreditation of Services for Families and Children

The BFPP under the direction of the DFC created the Accreditation of Services for Families and Children to coordinate efforts to begin the accreditation process with the Council on Accreditation (COA) of Services for Families and Children, Inc.

The COA is an international, independent, not-for-profit child and family service accrediting organization. COA was established in March 1977, co-founded by the Child Welfare League of America and Family Service America, and was incorporated as a separate entity in August 1977. COA publishes standards for the full array of child and family services, financial management/debt counseling services, behavioral healthcare services, and many service areas for which no other accreditor has standards.

The COA promotes best-practice standards; champions quality services for children, youth and families; and advocates for the value of accreditation. This is demonstrated by developing standards of best practice, providing educational and technical assistance programs, promoting a service focus that builds on individual and family strengths, developing a program of provider accreditation and advocating for national and international policies that promote high-quality services. COA accreditation ensures that children and families will receive highest quality services, demonstrates accountability in management of resources, and enables organizations to meet measurement and reporting requirements and receive public and private funding support.

There are three main phases in the accreditation process, the Application, the Self-Study and the Site Visit, followed by the Accreditation Decision made by the Accreditation Commission.

In the Application phase, the organization completes the application form and returns it to COA, with a description of the programs of service offered. COA notifies the organization of the acceptance of its application in a Financial Agreement that outlines the fee. Following receipt of the signed Financial Agreement, COA assigns an Accreditation Coordinator to the organization to begin the process. An Accreditation Agreement is developed that outlines the specialized service section applicable to the organization and a timetable is established for the onsite review. COA sends the Self-Study Manual, which contains the material and information necessary for the organization to begin the self-study.

In the Self-Study phase, the COA and the organization establish a schedule for the steps in the accreditation process. The organization completes the self-study and submits one copy to COA and distributes copies to the Review Team members. COA staff recruits the team of peer reviewers for the on-site review and informs the organization of their peer reviewers.

In the Site Visit phase, team members begin to determine compliance with the standards before the site visit. The team leader makes the site visit arrangements with the organization and the team completes the site visit, a minimum of two persons/two full days. The team submits its report to COA at the conclusion of the site visit and COA sends a preliminary accreditation report to the organization for response. The organization returns it response to COA within 30 days of receipt.

To facilitate the Accreditation Decision process, a non-identifying copy of the team report and organization's response is sent to the Accreditation Commission. The Commission reviews the report, changes any ratings as appropriate, and makes a decision regarding organization accreditation. The organization and the COA board are notified of the decision regarding accreditation. There is an appeals process available in cases of denial of accreditation.

COA accredits nearly 1,200 public and private organizations that provide child welfare services, behavioral healthcare services, and financial management/debt counseling services to 6,000,000 individuals and families in the United States and Canada.

The key element of COA's accreditation process is the peer system. Peer reviewers are experienced professionals in the behavioral health and human services fields who volunteer their time and expertise to participate in COA's accreditation process. They receive no monetary compensation and are reimbursed for the expenses incurred related to the site visit. By relying on well-trained, seasoned, skilled professionals to carry out the hands-on task of assessing organization compliance, COA is able to make available reviewers who are knowledgeable about current theory and practice and who also are accepted by organization personnel as professional peers. Currently, COA has more than 1,000 active peer reviewers.

Contracts and Grants are administered through the Bureau, and responsibilities for the ten funding sources are contracted out to private agencies throughout the state for the provision of direct services. The federal funding sources are:

- Social Services Block Grant
- Community Based Family Resource and Support Grant
- Preventive Health Block Grant (Sex Offense Services)
- Family Violence Prevention and Treatment Grant

### The state funding sources are:

- Domestic Violence Prevention and Treatment Fund
- Project Safe Place
- Youth Service Bureau Fund
- Children's Trust Fund (license plate sales and other donations)

These funds are allocated on a competitive basis to agencies providing services in these categories:

- Domestic Violence Prevention and Treatment Fund
- Family Planning, Youth Services, Child Abuse Prevention, Families and Children Services and Sexual Offense Services

The purpose of these services is to prevent or remedy abuse or exploitation of children and adults unable to protect their own interests; to promote positive youth development; or to preserve, rehabilitate, or reunify families. The most updated information about all grant opportunities can be found on the agency's website at: <a href="https://www.state.in.us/fssa/families/grants/family.html">www.state.in.us/fssa/families/grants/family.html</a>

### Please Note:

The Indiana Child Welfare Information System (ICWIS) includes institutional investigations in all abuse and neglect tables and charts for state fiscal year 2001. Also children can be counted in more than one investigation status for the same incidence report of abuse or neglect. For example, a child can be counted simultaneously as substantiated sexual abuse and substantiated neglect.

ICWIS is now using the federal definitions for race in all tables that show race. They are:

- 1. American Indian or Alaskan Native (having origins in any of the original peoples of North, Central or South America).
- 2. Asian (having origins in any of the original peoples of the Far East, Southeast Asia or Indian subcontinent).
- 3. Black/African American (having origins in any of the black racial groups of Africa).
- 4. Native Hawaiian or Other Pacific Islander (having origins in any of the original peoples of Hawaii, Guam, Samoa or other Pacific Islands).
- 5. White (having origins in any of the original peoples of Europe, the Middle East or North Africa).
- 6. Unavailable (unable to determine race).

Hispanic/Spanish/Latino is considered an ethnic origin and is reported for each of the above races as Hispanic.
